

AcneCyn

ACNE PREVENTION & TREATMENT KIT
FOR ALL SKIN TYPES

Gentle on Skin – Tough on Acne

Advanced Acne Vulgaris Management
with Microcyn Technology

Features

- CLEAR & ODORLESS
- CLEANS & HYDRATES
- KILLS ACNE-CAUSING BACTERIA
- REDUCES REDNESS & INFLAMMATION
- NON-IRRITATING, NON-STAINING
- HELPS PREVENT ACNE SCARS
- SAFE TO USE AROUND MOUTH, EYE & NOSE
- SUPPORTS BODIES OWN HEALING PROCESS

TRIPLE ACTION
Innovative & Skin Friendly product
Free From Artificial Ingredients

NOURISHING THE SKIN

Safely Eradicates Microorganisms
Causing Odor & Infections

HELP COMBAT ACNE

Reduce Pain, Itch &
Swelling Fast

REPAIRS SKIN

AcneCyn™ Assists in Repairing
the Skin's Natural Barrier

NO STEROIDS – NO CHEMICAL – NO ANTIBIOTICS

- For All Types of Acne, including that on your Face, Back, Chest or Anywhere else on your body.
- pH Balanced, Non-Irritating & Non-Toxic, Clinically demonstrated to eliminate 98% of Propionibacterium Acne in 60 Seconds
- Free of Benzoyl Peroxide, Salicylic Acid, Alcohol, Parabens, Antibiotics or Steroids
- HOCl Performance Stabilized formula Helps in breakout management
- Visibly reduces acne lesions

AcneCyn™ with Innovative Microcyn Technology Acts To Reduce Acne:

AcneCyn™ solution & hydrogel with patented technology is intended to assist in the treatment of topical mild to moderate acne. It is easy to use and suitable for daily use by nearly anyone. Men and women, adults or teens, regardless of age. For any and all types of acne, including that on your face, back, chest or anywhere else on your body.

AcneCyn™ assists in restoring the skin's natural flora. AcneCyn™ solution & hydrogel has anti-inflammatory properties which helps to reduce redness. AcneCyn™ is an acne treatment for pimples, blackheads, whiteheads or even just leftover redness from an old blemish that isn't fading quickly enough.

AcneCyn™ Solution & hydrogel can be used under make up or during long periods of time without causing side-effects.

AcneCyn™ is Easy to Use, Extremely Comfortable & Convenient

*Journal of Dermatological Treatment. 2009; 20:289–292 Efficacy and tolerance of super oxidized solution in the treatment of mild to moderate inflammatory acne. A double-blinded, placebo-controlled, parallel-group, randomized, clinical trial. Andrés Tirado-Sánchez & Rosa Maria Ponce-Olivera

DID YOU KNOW?

Different Types of Acne

Acne is an umbrella term, referring to a number of different conditions. One thing that they all share in common is that they are the result of clogged pores. Acne can be either noninflammatory or inflammatory. The causes range from hormonal imbalance and bacteria, to excess oil production in the skin.

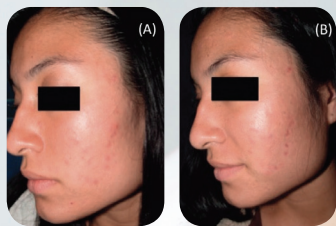

Non-Inflammatory Acne

This term includes blackheads and whiteheads, neither of which cause swelling on the surface of the skin. While blackheads are open comedones, whiteheads are close. This means that the top of the clogged pore is open for blackheads, but shut in whiteheads. This makes it difficult to manage whiteheads.

Inflammatory Acne

Pimples that become bright red and swell up are inflammatory acne. Sebum that blocks and clogs pores is the main cause of such acne but bacteria can exacerbate the condition. Cystic acne is another common type of inflammatory acne that you can recognize by how painful they are.

In a 12 weeks double-blinded, placebo controlled, parallel-group, randomized, clinical trial with GramaDerm™ (AcneCyn™) vs Benzoyl Peroxide among 87 patients. The outcome was significant compared to the standard acne treatment with Benzoyl Peroxide.

- In this pilot study, application of GramaDerm™ (AcneCyn™) reduced prevalence of acne blemishes by 65% versus 54% for Benzoyl Peroxide (BP).
- GramaDerm™ (AcneCyn™) eliminated 98% of Propionibacterium acnes in 60 seconds without inducing bacteria resistance.
- No adverse effects were associated with the use of GramaDerm™ (AcneCyn™) while Benzoyl Peroxide was associated with stinging, bacterial resistance, erythema and drying or peeling of the skin.

The effect of Super Oxidized Solution on mild-to-moderate inflammatory acne lesions at baseline (A) and at 12 weeks (B).

HOW TO USE:

AcneCyn™ is Easy to Use, Extremely Comfortable & Convenient

AcneCyn™ is ready for use with no mixing or dilution required.

1. Wash the affected area with AcneCyn™ Solution and allow solution to act for 5 minutes. Let skin dry and do not wash off.
2. Cover the affected area with a thin layer of AcneCyn™ hydrogel and rub gently until evenly distributed into the skin. Let skin dry.
3. Repeat 3 times daily.
